Primer

To whom it might concern,

Herewith BASF would like to state that the primers Epoprime EB 712 and Epoprime EB 710 manufactured by Merks Construction Chemicals A.S. are fully compatible with Elastocoat C 6325/124 and Elastocoat C 6335/101 and Elastocoat C 6325/125 from BASF, for use on concrete surfaces.

This assessment is based on:

- Internal and external qualification trials,
- Long standing track record for the above mentioned combination.

The above statement is based upon correct surface preparation, correct primer usage and correct processing of the Elastocoat, all actions observing the Technical Data Sheet and other company specific recommendations.

With kind regards,

Dr. Julio Albuerne
Group Leader CASE
